

Khadija Sultana

Data Analyst

ksultanawork@gmail.com

(737)203-0052

Communicative and quick-to-learn recent computer science graduate seeking an opportunity as a Data Analyst to contribute towards meaningful data-driven decisions and the organization's growth.

PROJECTS

Sentiment Analysis of Social Media data

- Conducted Sentiment Analysis on Twitter data using Python and Natural Language Processing and gained public insights on specific topics.

Location Tracking App

- Developed an Android app based on GPS Tracking System that would help friends view their friends' location. The location of the concerned person is periodically updated and the changed coordinates of the location are reflected to the friends in their app.

Web Traffic Analysis

- With Python's data analysis capabilities and matplotlib's visualization functionalities, we used 3 months of website traffic to gain insightful and actionable information. Understanding website traffic patterns and identifying anomalies helped improve user experience.

EDUCATION

G. Narayanamma Institute of Technology and Sciences -

Bachelor of Technology, Computer Science

GPA: 3.8

Hyderabad

SKILLS
